

General Safety Web Manual

Office of Environmental Health and Safety

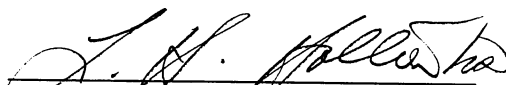

April 2010

SAFETY POLICY STATEMENT

The Louisiana State University Health Sciences Center in New Orleans considers safety to be an important function of the University. As employees, it is our duty to know and follow the safety rules, policies and regulations that are adopted by the facility.

It is the goal of LSUHSC-NO to eliminate or minimize suffering and the adverse economic impact that accidents have on both employees and the University. This goal can be achieved only through the support and commitment of each employee. It is the responsibility of each individual to help prevent personal injury and loss of property caused by accidents. It is the responsibility of every supervisor to ensure that they and their employees follow all safety rules, policies and procedures. In order to promote this goal, this manual has been developed and adopted to acquaint all employees with this aspect of their responsibilities.

Your cooperation and participation in the Loss Control Program and our efforts to reduce accidents is necessary to maintain the University's excellence in safety matters.

Dr. Larry H. Hollier
Chancellor
